

Parshant Vardhan

parshantvardhan63@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Professional Summary

BE-CSE student with expertise in full-stack and mobile development, AI-driven project implementation, and cloud fundamentals. Published a live app on the Google Play Store, holds a patent, and has solved 300+ DSA problems on LeetCode.

Experience

Full Stack Developer Intern — RhythmiqCX

October 2025 – Present

AI-powered Customer Support & Voice AI Platform

- Built and integrated RESTful APIs with full CRUD operations, connecting the Next.js frontend with backend data sources.
- Developed a User Analytics Dashboard enabling business clients to track and measure key performance metrics in real time.
- Worked with backend databases to store, retrieve, and manage customer interaction data at scale.

Education

Bachelor of Engineering (BE) — Computer Science, Chandigarh University

2022 – 2026 | CGPA: 8.36

Intermediate — DAV Sen Sec Public School (CBSE)

2021 – 2022 | 81.8%

Matriculation — DAV Sen Sec Public School (CBSE)

2019 – 2020 | 89.4%

Projects

[Intelligent Text-to-Video Generation with Multilingual Support](#)

- Engineered a text-to-animation system converting natural language prompts into educational STEM videos using the Manim engine and Groq API for dynamic script generation.
- Added multilingual translation, AI voice dubbing, and TTS narration via Murf API to expand global accessibility.

[V8 Designs — Free Wallpaper Platform](#)

- Built a production-deployed full-stack wallpaper platform featuring AI modern art and digital art collections, live at [v8designs.onrender.com](#).
- Integrated Cloudinary for cloud image storage and delivery, and MongoDB for wallpaper metadata, categories, and content management.

[MotorIQ — AI Fuel Tracker \(Published on Google Play Store\)](#)

React Native mobile app · Live on Google Play Store

- Built and published a cross-platform fuel tracking mobile app using React Native, live on the Google Play Store under Rhythmiq Apps.
- Integrated Supabase as the backend — handling user authentication, real-time database, and secure data storage for fuel logs and vehicle records.
- Implemented key features including OCR receipt scanning, MPG tracking with charts, trip cost calculator, nearby fuel price finder, and AI-powered driving insights (Pro).

[Dual Piezoelectric Energy Harvesting Key](#) App. No: 202411070768

- Innovated a dual energy harvesting keyboard using 2 piezoelectric transducers per key; differentiates light vs hard presses increasing energy capture by up to 50%.
- Unified 2 conductive membranes with a microcontroller achieving 99% accurate key press detection.

Technical Proficiency

Languages: C++, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: React, React Native, Next.js, Tailwind CSS, Django

Databases & Cloud: MongoDB, Supabase, Firebase, Cloudinary, Azure

AI & Dev Tools: Claude Code, GitHub Copilot, Cursor AI, Git, Vercel, VS Code, Warp

Other Skills: SEO Optimization, REST API Design, Mobile App Publishing (Play Store)

Key Achievements

- Published MotorIQ on Google Play Store — a production React Native app with AI features and Pro subscription tier
- Google IT Support — Technical Fundamentals Certification
- Consistently solved 300+ DSA problems on LeetCode
